

# Midterm Prep

# Idea

A room with responsive lighting for a game.

Size: 12' x 18' room.

Who: People who play or are interested in VR games. Also people who are viewing / want to record.

The lights will be laid out in a dark room and will light up and change colors based on the lighting in the game as well as the audio in the game. The lighting will be tailored to specific games. Those games would probably be Beat Saber and Phasmophobia.
