

# Final Proposal

📅 Date	@Apr 14, 2021
🏷️ Tags	CSMA 212

Who: Locals / Residents

What: Modern Residential Building

Interaction: Onlookers can watch the changes in the projection, while the residents can influence the projection.

I want the residents to be able to roam around the connecting area and change the content projected depending on where they are.

This is based on a similar show as the Tokyo train station reopening I showed earlier in the semester.
